

Holistic Doorset & Ironmongery Solutions

Micro Catalogue - Volume 1.1

About Us

Born from the myth of the Valkyrie, the modern translation Valkry stands for strength, protection, and purpose. A symbol for those who guard what matters and rise with courage—Valkry is more than a name.

It's a shield. A standard. A way forward.

The construction industry has experienced a significant evolution in recent years, especially in the refurb and maintenance sector. With increasingly complex compliance requirements, tighter budgets, accelerated project timelines, and growing client expectations, the traditional approach to project delivery is no longer sufficient.

In response to these shifting dynamics, Valkry Solutions was founded to bring a vital, forward-thinking service to the UK doorset and ironmongery market - specifically focusing on the refurb and maintenance sector. Drawing on decades of combined industry expertise, we blend innovative new technologies, modern methodologies, and a fresh, holistic approach to meet today's demanding project landscapes. We don't just supply products or deliver a service—we provide a complete, connected, holistic package. From design and specification to site coordination and compliance, we fill in the gap's others overlook. Our approach bridges the divide between concept and construction, ensuring every detail is aligned, compliant, and delivered with precision.

Operating primarily across the North of England, Valkry Solutions is dedicated to supporting small to medium-sized specialist, refurb and maintenance projects. Our regional focus and hands-on, collaborative approach enable us to provide bespoke, agile solutions that directly address the unique challenges of each project.

We're not just another doorset supplier. We are here to reshape the industry—raising the bar, challenging conventions, and delivering smarter solutions that make a real difference.

If you're tired of being treated like a second priority, let's talk about how we can make your next project a success

Most doorset suppliers focus on large-scale, high-volume projects—primarily in the new-build sector. As a result, smaller, specialist, or more complex projects are often treated as an afterthought, with limited service, poor communication, and off-the-shelf solutions that fail to address the customer’s unique requirements. This problem is even more pronounced in refurbishment and maintenance projects, where there are often specific constraints, urgent timelines, and a critical need for clear, responsive communication. Yet many suppliers overlook these factors entirely and offer little to no on-site support—leading to costly delays, compatibility issues, and, in some cases, outright project failure.

We Do Things Differently

We focus on supporting customers who need a more tailored, hands-on approach—whether you're working on a refurbishment, a heritage project, or a complex installation with specific requirements.

- ✓ Personalized service from start to finish
 - ✓ Expert advice tailored to the unique challenges of refurbishment & maintenance projects
 - ✓ Fast, reliable lead times with no compromise on quality
 - ✓ Full site support, including surveys and installation guidance
 - ✓ Doorset solutions designed to compliment you and your project
- ✓ No minimum order volumes - Every order is our top priority
 - ✓ Ongoing aftercare and technical support
 - ✓ Industry leading response times - Enquires returned within 48 hours
 - ✓ Industry leading delivery times - 4-6 weeks on smaller projects

Our mission is simple: to deliver a service unmatched in the market, with the ultimate goal of perfect delivery every time—making our customers look exceptional in the process. Drawing on over a decade of industry experience, we have developed our proprietary 5-Star Service Module, a proven system that transforms project delivery. This module is powered by four key pillars: **Speed, Support, Communication and Compliance**. Together, these pillars create a seamless, results-driven approach that not only achieves flawless outcomes but also strengthens our clients’ reputations and builds lasting trust.

Speed

Be the fastest responder in the market—delivering quick, intelligent solutions when you need them most.

In today’s fast-moving world of construction, time is everything. We understand that delays cost more than just money — they cost momentum. That’s why we commit to providing unrivalled speed in everything we do — from responding to enquiries and resolving issues to mobilizing on-site activity. When you need us, we’re already there — because your timeline is our priority

Support

Offer expert guidance, precision tools, and end-to-end service to help you win, launch, and deliver

We aim to provide the best support in the market — from design and technical input to compliance and commercial guidance. Leveraging the latest technology, we deliver high-quality drawings, data, and tailored options to support your project. We're with you from start to finish, helping you secure the job, get it off to the best possible start, and ensure it’s delivered on time and on budget.

Compliance

Ensure full compliance with specifications and building regulations, standards-driven construction.

We focus on supplying fully compliant design and specification solutions that are presented in a clear, straightforward format. By simplifying complex technical information, we make it easier for customers to understand, select, and procure the right products with confidence. Our approach removes confusion, reduces risk, and ensures full industry compliance.

Communication

Provide clear, professional, transparent, and honest communication you can trust and rely on.

Great projects are built on great communication. From resource planning to real-time problem-solving, clear dialogue is the foundation of success. That’s why we commit to providing precise instructions, timely feedback, and regular updates on all enquiries and orders for you to track progress and plan resources accordingly.

Our customers success sits at the heart of everything we do

We’ve worked hard to bring you the very best that the UK industry has to offer. Our team has carefully selected, tested, and curated a comprehensive range of top-tier products, all in one convenient place, with industry besting lead times. Whether you’re looking for trusted staples or the latest innovations, our offerings reflect our commitment to quality, performance, and customer satisfaction.

Our door collection is designed to meet the diverse needs of all conventional, heritage and modern buildings. We offer three distinct ranges: **Residential, Designer, and Architectural**. Each has been carefully developed to deliver unique advantages—whether the priority is cost-effectiveness, long-term durability, refined aesthetics, advanced functionality, or high-level performance.

This structure ensures there is a perfect solution for every sector, from everyday living spaces to ambitious design projects and demanding commercial environments.

Range	Fire	Acoustic	Sizing	Durability	Aesthetic
Residential	30 – 60	29dB	Standard	Standard	Economy
Designer	30 – 60	31dB	Standard	Standard	Standard
Architectural	30 – 120	32 – 43dB	Made to Order	High	High

Our residential range is designed as an economical solution for high-volume housing projects. Offering reliable quality at competitive price points, these doors are ideal for residential developments where practicality, efficiency, and cost-effectiveness are key.

Ideal Applications: Residential

Residential
Paintgrade

Moulded
Panel

When it comes to procuring doorsets, there’s more to consider than just cost. Aesthetics, functionality, durability, sustainability, certification, and installation all matter — but these factors are often misunderstood or overlooked - That’s where we’re different. We don’t just supply doorsets. We create bespoke opening solutions tailored to suit the complex requirements of refurb and maintenance projects

An Industry Problem

Most doorset solutions on the market are designed with new-build projects in mind, where site access, dimensions, and conditions are relatively predictable. However, refurbishment and maintenance works bring a very different set of challenges that these standardized products rarely address. Access to work areas is often restricted, delivery routes can be constrained, and installation may need to take place in occupied or sensitive environments with minimal disruption. In addition, existing openings are frequently irregular or non-standard, making it difficult – if not impossible – to use commodity-sized products without extensive onsite modifications.

This mismatch between off-the-shelf solutions and real-world refurbishment conditions creates inefficiencies, delays, and additional costs.

Our doorsets are engineered to add value at every stage of a project. Precision-built and tailored to each application, they meet our customers’ exact requirements while reducing costs and saving resources. The result is a consistent, high-quality finish that enhances the overall build. To help customers get the most from their design choices, we include a clear solution checklist with our schedules and assign a Doorset Efficiency Rating (DER), making it easier to understand the solutions selected and the efficiencies they deliver.

Refurb-Calibrated Doorset Solutions	A DER	Typical Industry Doorsets	D DER
- Doorsets Pre-Hung in Frames - Ironmongery Supplied & Fitted - Under Door Gaps Adjusted & Fixing Points Pre-Drilled - Doorsets Sized to Compliment Your Openings - Doorsets Fully Factory Finished - Architrave Pre-Sized, mitred & Hoffman’d - Intumescent Factory Fitted - Doorsets Fitted with Dropseals and/or Thresholds - Durability & Functionality Matched to Environment Type		- Doorsets Pre-Hung in Frames - Ironmongery Supplied with 1st Fit Components Fitted - Under Door Gaps & Fixing Points Made/Adjusted Onsite - Opening Sizes Made to Compliment Your Doorsets - Doorset Primed Ready For Onsite Finishing - Architrave Cut & Adjusted Onsite - Intumescent Fitted Onsite - Onsite Adjustment For Under Door Gaps Required - Low Grade Durability Despite Environmental Conditions	
Typical Finished Installation Time: 20-30 minuets		Typical Finished Installation Time: 50-60 minuets	

Available Solutions

We Only Work With The Best

In a landscape of evolving standards and growing responsibility, staying ahead of industry regulations isn’t just important — it’s non-negotiable. We actively collaborate with manufacturers, certification bodies, and key industry contributors to ensure our solutions are always aligned with the latest requirements. Our commitment is simple: to deliver compliant, fully-certified solutions that are right first time. Behind the scenes, we operate a rigorous supplier vetting process — Only those who meet our exacting standards make it into our supply chain.

- ✓ Third Party Accredited
- ✓ BWF, FDA or ASFP Member
- ✓ ConstructionLine or NBS Member
- ✓ Manufactured in UK
- ✓ ISO 9001 QMS
- ✓ Quality Support System
- ✓ Supply Chain School Silver/Gold Accredited

We provide a versatile and meticulously selected range of architectural ironmongery, sourced from some of the industries most known and trusted brands. Our offering is designed to accommodate varying aesthetic styles, functional requirements, and budget levels. With a focus on durability, design cohesion, and performance, our ironmongery solutions are ideal for both residential and commercial building applications.

Traditionally, ironmongery was supplied separately from doorsets—a practice that often led to complications with compliance, installation delays, and mismatched finishes. Today, ironmongery is typically delivered as part of a complete doorset package.

At Valkry Solutions, we embrace this modern approach by partnering with leading brands to deliver fully integrated, visually cohesive, and regulation-compliant ironmongery solutions. Whether you're seeking an economical range for residential developments or a high-performance, durable specification for commercial environments, we tailor each package to meet the exact needs of your project.

Factory Fitted Solution

With our factory fitting service, all ironmongery—except the door closer—is expertly installed before the doorset leaves our facility. This ensures a higher standard of finish, consistent quality across every unit, and full compliance with specifications. It also reduces the risk of missing components on site and offers significant cost savings compared to traditional onsite installation.

- ✓ Reduces Installation Costs – Saves Time
- ✓ Improved Finished Product Quality
- ✓ Uniformed and Compliant Installations
- ✓ Reduces Onsite Management & Losses

No matter the functionality, finish, or style you're looking for, we can create the perfect ironmongery solution tailored to your project. If you're unsure which products you need, our team can help develop detailed specifications and schedules to ensure every item fits your requirements. From doorsets to complementary ironmongery solutions, everything is available under one roof, providing a seamless, coordinated approach for your project.

Closers Hinges Pivots Locks & Latches Levers

Pull Handles Turns & Operators Cylinders Kick Plates Signage

Numerals Panic Hardware Codelocks Anti-ligature Anti-Barricade

Finger Guards Letter Plates PAS24 Systems Sundry Access Control

Our customers' success is at the heart of everything we do. Through our holistic support services, we guide clients through projects from start to finish—navigating the complex world of doorsets with expertise and care, to delivery projects successfully, every time.

Many projects fail not because of a single flaw, but due to a disconnect between critical elements: knowledge, resources, design, site operations, and regulatory compliance. When these components do not align, projects suffer from delays, cost overruns, rework, or even systemic breakdowns.

Our holistic services are designed to bridge the gaps between specification, supply and site - targeting critical failure points and providing support. By connecting these elements from concept through execution, we help deliver projects that are robust, efficient, and successful

Specification. Site. Supply

- ✓ Accelerate development-to-manufacture-to-installation: Reduce lead times and complete projects quicker
- ✓ Maximize resource efficiency: Expand the impact of your existing resources and streamline operations
- ✓ Enhance quality and accuracy: Improve precision across every stage of your processes

Concept Development

Our concept development process transforms ideas into actionable plans and detailed doorset specifications. We assess design integrity, durability, functionality, compliance, and budget alignment to ensure your project is practical, sustainable, and ready for the next stage of development. During concept develop we create detailed drawings, specifications, compliance maps, digital mood boards and prototypes for approval and design freeze.

Survey Support

A successful project starts with a detailed and accurate site survey. Our team can collaborate closely with you as an extension of your workforce, or operate independently to deliver exactly the level of support you need. From non-intrusive maintenance and rectification surveys, to full intrusive product reviews, through to installation checks, we provide the insight required to build a clear and reliable understanding of what's onsite, its current status, and the most effective path forward.

Solution Management

Once an order is placed, a dedicated Solutions Manager is assigned to your project to oversee the journey from order to manufacture. They resolve outstanding issues, submit drawings for approval, and create manufacturing schedules. Acting as the primary point of contact, they also attend site meetings and can assist with surveys, effectively bridging the gap between site and manufacturing to ensure smooth project delivery.

Deployment Aftercare

Our aftercare service is designed to ensure that every doorset we supply continues to perform to the highest standards for as long as possible. By combining expert technical support with practical customer collaboration, we help maintain safety, durability, and functionality long after installation. From routine maintenance guidance to responsive support when it's needed most, our focus is on protecting your investment and giving you confidence that your doorset will keep working exactly as required

Making a Difference

Together, we strive to create a world where respect, collaboration, and innovation thrive—making the industry we work in and the environments we live in better for everyone. Every order you place is more than a transaction; it contributes to this shared goal and helps make a positive impact every day

Social Values

Whitby isn't just where we do business—it's where we belong. We're proud to be part of this unique coastal town, and we believe that success should be something everyone can share in. While tourism brings energy and growth to Whitby, we know that many local residents still face limited job prospects and career opportunities. That's why we're taking action. Our mission is to create real, lasting impact by hiring locally, offering meaningful career development, and building a workplace where people can grow and thrive.

We're also passionate about giving back. From supporting local charities to partnering with other Whitby businesses, we're committed to strengthening the community that supports us.

Environmental Mission

It's important we look after the world we live in—for ourselves, our communities, and future generations. That's why we take our environmental responsibilities seriously and place sustainability at the heart of everything we do. We're committed to operating in the leanest, most carbon-efficient way possible, continually improving our processes to reduce waste and minimize our footprint. Our supply chain is held to the same high standards, with strict environmental requirements for all partners and providers.

But we don't stop there. We actively collaborate with our customers to select environmentally friendly solutions that reduce impact without compromising on quality or performance.
